Dear Hiring Manager,

I am writing to express my interest in opportunities within **Data Analytics, Business Intelligence, and Business Reporting** at your organization. I am particularly interested in working with organizations that use data to understand business performance, identify opportunities, solve operational challenges, and support better decision-making.

With **5+ years of professional experience** across MIS, business reporting, operational analysis, and data-driven decision support, I have developed a strong combination of **business understanding and analytical capability**. In my current role as a Senior MIS Analyst, I work with billing, inventory, purchase, and operational data, analyze large datasets, develop KPI reports and dashboards, validate data, and collaborate with finance, operations, and management stakeholders. My previous experience in the retail industry has further strengthened my understanding of sales, financial, operational, and business performance data.

My technical toolkit includes **SQL, Microsoft Excel, Google Sheets, Power BI, Tableau, DAX, Power Query, and data visualization**, with growing proficiency in **Python and Pandas**. I have experience working with large datasets, developing dashboards and reports, performing data validation and analysis, tracking KPIs, and translating business requirements into meaningful information for stakeholders.

What I believe differentiates me is that I do not view analytics simply as extracting data or creating dashboards. I focus on connecting **data with the underlying business question**:

What is happening? → Why is it happening? → What does the data tell us? → What should the business pay attention to?

This combination of **analytical thinking, business understanding, reporting experience, technical skills, attention to data accuracy, and stakeholder communication** allows me to approach analytical problems from both a data and business perspective.

I am now looking to bring this experience into a dedicated **Data Analytics / Business Intelligence environment**, where I can contribute to business decision-making while continuing to strengthen my capabilities in advanced analytics, Python, data modelling, and modern data practices.

I would welcome the opportunity to discuss how my experience and analytical capabilities could contribute to your organization.

Thank you for your time and consideration. I look forward to the possibility of connecting with you.

Sincerely,

Amit Kumar

Senior MIS Analyst | Data Analytics & Business Intelligence

SQL | Power BI | Tableau | Excel | Python/Pandas
