OBJECTIVE

To secure a Data Analyst opportunity where I can leverage my experience in SQL, Power BI, Tableau, Excel, business reporting, dashboard development, data analysis, and stakeholder collaboration to transform complex business data into actionable insights and support data-driven decision-making within a growth-oriented organization.

SUMMARY OF QUALIFICATIONS

Data and Business Intelligence professional with **6+ years of experience** in MIS reporting, business analysis, KPI tracking, dashboard development, data validation, and operational analytics across **IT equipment rental, retail, staffing, and financial services projects**. Experienced in analysing large datasets and converting business and operational data into reports and insights for management and cross-functional stakeholders. Strong hands-on capability in **SQL, Microsoft Excel, Google Sheets, Power BI, Tableau, DAX, Power Query, Pandas and data visualization**, with growing knowledge of Python and Pandas. Developed analytical dashboards covering sales, profitability, customer behaviour, churn, HR analytics, inventory, billing, operational performance, and business KPIs. Brings a combination of analytical thinking, business understanding, reporting expertise, attention to data accuracy, and experience collaborating with finance, operations, and management teams.
